

StrutTamer™

EXTREME

6591

Simply the most effective compressor for virtually any straight, conical, or offset spring.

- Extreme duty design to handle the heavier springs found on mid- and some full-size truck strut assemblies.
- New frame includes cross bracing at arm mount locations - standard. This eliminates frame flex when compressing heavier springs.
- 2:1 reduction gearbox - standard. Allows for a 2:1 torque compression increase when compressing struts.
- Lock rings to hold arms in position - standard. This eliminates arms from spreading or sliding when compressing offset or unique strut configurations.
- Four-point locking jaws securely hold the spring in place.
- Open-ended design means you can take the strut in and out, quickly and easily.
- The arms adjust in and out, up and down, to accept many sizes of springs.
 - (2-1/2" to 10" diameter)
 - (2-1/2" to 24" vertical stroke)
- Extra long 3-bar handle gives user the leverage needed to compress heavier strut springs.
- No need to change shoes for different size springs.
- Easy to transport when mounted on optional stand (No. 6592 – StrutTamer Extreme with stand; No. 6582 – stand only)
- Comes with No. 6583 Bridge accessory to be used on springs that cannot be compressed enough to remove the retaining nut.

StrutTamer[™] EXTREME

OTC's StrutTamer Extreme for strut springs. This is simply the most effective compressor for handling virtually any straight, conical, or offset spring. With its adjustable arms and four-point locking jaws, the StrutTamer Extreme securely holds the spring in place.

To keep the strut assembly straight during compression, we've developed a center screw that floats from side-to-side. This way the strut and spring remain aligned – no matter what condition the spring is in. The StrutTamer Extreme also features an extra long 3-bar handle crank with the needed leverage to compress heavy-duty springs faster and easier. The StrutTamer Extreme can easily be mounted to the wall without the need for adapters, or you can choose the optional stand.

The OTC StrutTamer Extreme stand features steel frame construction with two wheels that allow you to easily tilt the stand back and move the entire unit to the work area. The stand's narrow design allows for easier mobility between vehicles in the shop. During compression, the wheels lift off the floor, and four no-slip rubber pads keep the stand firmly in place.

Strut Spring Coverage

2-1/2" to 10" spring diameters
2-1/2" to 24" vertical stroke range

No. 6591 – StrutTamer Extreme strut spring compressor. Wt., 82 lbs.

No. 6592 – StrutTamer Extreme. Includes StrutTamer spring compressor and mobile stand. Wt., 150 lbs.

No. 6582 – StrutTamer stand. Wt., 68 lbs.

No. 6583 – Bridge accessory.

Note: 6591, 6592
can all be shipped UPS.
